News of the Realm

Highland Fling

Huzzah and welcome to our Village and a wonderful festival day celebrating the birthday of Prince William! As per tradition, the King and Queen have proclaimed that we shall gather the finest crafters and artisans, a cornucopia of food, challenging and adventurous games, music, and stages full of acts of comedy and skill. Of course, a festival day would not be complete without our most important guest, you! Our villagers, royalty, and fantastic visitors can't wait to welcome you through the gates and into a world of fun, laughter, and magic. Huzzah to over 50 years of celebration!

Highland Fling Events and Schedule

Highland Fling Vendors

Check out the Highland Fling Vendors during this weekend ONLY! Visit them on Shepherd's Green Field throughout the day.

Highland Games

Stop by Shepherd's Green Field throughout the day to see your favorite Highland Games Events. Games begin at 9:15am!

- **Hammer Throw** The hammer head is a 16 or 22 pound iron ball on the end of a cane shaft, measuring 4 feet 2 inches overall. The hammer is thrown from behind a trig and the athlete is allowed to count the best of three throws.
- **Stone of Strength** The stone of strength is the Scottish shot put. It weighs about 16 or 22 pounds. Legend has it that the distance a guest of Scottish landlord could put the stone of strength determined the sleeping accommodations he could expect to receive during his stay. The stone is put with one hand, from behind the trig.
- **Weight Throw** Weight for distance event. The weight is made from iron and is spherical or box shaped with a chain and ring attached. The total length is 18 inches and the weight is either 28 lbs. (2 stones) or 56 lbs (half a hundred weight). The weight is thrown with one hand for distance from behind a marker or trig and the best of three throws is counted.
- **Caber Toss** An Iconic Event! The caber is a long straight tree trunk for which there is no standard size or weight. It should, however, be too large for any athlete to toss, and then be cut shorter by stages until one competitor is able to toss it end over end. To do this, the athlete balances the caber on its small end and then picks it up and runs with it before heaving it end over end to land, he hopes, pointing directly away from him. This would be called a 12 o'clock throw. The competitor who tosses the caber closest to this position wins the day, look at that form! Cabers generally measure between 15 and 20 feet long and between 90 to 120 lbs.
- **Sheaf Toss A** 16 lb. sheaf of hay, enclosed in a jute sack, is tossed over a bar with a pitchfork. The bar is raised in steady increments until all but one competitor is eliminated. Each athlete receives three tries at each height.
- **Weight Toss** In this event, a 56lb weight is tossed for height.
